Project Objectives

- -Identify top revenue-generating makes and models.
- Analyze the relationship between pricing, mileage, and vehicle age.
- Evaluate regional performance and emerging customer preferences

Revenue	Units Sold	Profit Margin
7.6B	558.8K	-8.4M

Revenue Drivers by Make

- **Key Insight:** Specific brands represent a disproportionate share of total revenue.
- **Strategy:** Prioritize inventory procurement for these high-performing makes to ensure consistent cash flow.

Top 10 by Revenue

Selling Price Trend

Profitability & Inventory Tiers

High Margin Tier (>10%): These vehicles are our most efficient assets and should be the focus of inventory expansion.

Low Margin Tier (<5%):
Requires optimized pricing or promotional strategies to increase turnover and clear storage space.

Revenue by Performance Tier

Regional Sales Performance

- **Top Performer:** California (CA) leads in total units sold.
- **Recommendation:** Focus dealership network expansion in high-volume hubs to capture existing market demand.

Price vs. Mileage Relationship

- **Trend:** There is a clear correlation between lower mileage and higher profit margins.
- **Procurement Action:** Target vehicles with lower mileage within the top-performing makes to maintain high-margin stock.

Strategic Recommendations

- **Inventory Optimization:** Shift procurement focus toward high-margin performance tiers.
- **Regional Strategy:** Expand footprint in high-volume regions like CA.
- **Continuous Monitoring:** Utilize the interactive Looker Studio dashboard for real-time tracking of sales trends and pricing.
